

Education Committee

Chair (s): Maria Die Trill and Tania Estapé (Spain)

Goal: to approve training requests that apply for IPOS endorsement , according to IPOS values

Up to two key accomplishments:

1. For local CANCER SPECIFIC TRAINING program (in person, virtual, webcast, workshop) that may request IPOS endorsement, an email containing the form to be filled out. This form was designed to ease and to homogenize the procedure. It can be found in the IPOS website at: [download/complete/submit the following form](#)
- 2). The completed forms should be first submitted to IPOS, then IPOS Admin should send to the IPOS Executive Director for passing along to the Education Committee for review and consideration. Two-months advance required (minimum), unless the applicant needs approval in less time, which should justify

Three key initiatives underway for 2023:

1. Continue with the same procedure
2. Try to involve more training and public education activities for patients and the general population
3. Our goal for 2023 has been also to update the list of members who had formerly been part of this SIG. After contacting them and receiving signs of interest, or not, the current membership list is as follows: Barry D. Bultz, Miri Cohen, Annett Korner, Anja Mehnert, Maggie Watson, Joachim Weiss, Gil Goldzweig
